

**Safety, clarity and
movement**

Guide cone adapter with switching function

For attaching the TRIOPAN warning lights FIREBALL and HELIOS BLAZE to guide cones and the switching function in the installed adapter.

The warning light can be switched on and off using the switch on the inside of the built-in adapter, even when wearing gloves. The adapter is supplied loose and can be changed without tools by loosening the knurled nut on the battery compartment and replacing the base.

This **NEW guide cone adapter** allows the comfortable operation of the **FIREBALL** and **HELIOS BLAZE** light without separating adapter and light.

Your added value:

- Fireball/Blaze can be converted without tools
- Fireball and Blaze become the "rod flashlight"
- Very pleasant operation of the lamp: activation of the lamp via adapter piece
