

TRIOPAN

A new generation of our Helios Master model

We are excited to present you with the fourth generation of our Helios Master flashing light. Our latest Helios Master stands firm with «both feet» on the ground! Its **optional folding legs** make sure it remains stable when it's windy and – alongside use on the TRIOPAN folding sign – ensure it can easily be employed on the ground.

The NEW Helios Master flashing light is available in yellow, red, blue and green. The Master light features the following impressive functions:

- **Single flash**
- **Double flash**
- **Triple flash**
- **Background lighting**

The lights are controlled by a microprocessor and powered by commercially available zinc-carbon batteries. You can use the **customer-friendly locking lever system** to open or close the battery compartment in seconds, without needing any tools.

Your added value with the Helios Master:

- Intuitive use and versatile functions
- Stable **adapter option** for the Triopan folding sign **integrated** into the bottom of the light
- Customer-friendly and quick battery change
- Precision work: from the integrated handle in the lens to the user-friendly folding legs
